

Capital and Business Partnership with MIRAI-LABO

- Accelerating development of battery logistics platform -

SENKO Group Holdings Co., Ltd. (Head office, Koto-ku, Tokyo; President, Yasuhisa Fukuda; “SENKO Group”) set up a capital and business partnership on January 27 with MIRAI-LABO Co., Ltd. (Head office, Hachioji, Tokyo; President, Toshio Hiratsuka; “MIRAI-LABO”), a company developing environmental platforms such as solar panel roads and reused EV batteries.

[Recycling system for EV batteries using the battery logistics platform]

MIRAI-LABO develops a broad range of environmentally friendly products based on solar panel road power generation technology, battery technology, and energy efficiency lighting technology in line with its environmentalist corporate philosophy, and is also involved in deterioration diagnosis of used EV batteries and development of reused products. As a developer of environmental platforms, MIRAI-LABO will coordinate efforts as a business partner while contributing to efforts to build a sustainable global environment with a view 100 years into the future.

Since last year, the SENKO Group has concentrated efforts toward developing a logistics platform for the production, sales and recycling of batteries used with electric vehicles and solar power generation. It has concluded a capital and business partnership with MIRAI-LABO with the aim of

accelerating the rate of development in order to create new markets for energy logistics and expand business.

This capital and business partnership will allow the SENKO Group to provide reliable logistics services to the entire supply chain associated with the procurement, production, sales, reuse, and recycling of products developed for energy efficiency by MIRAI-LABO and its contracted companies. It will also give SENKO Group companies increased opportunities to install energy-efficient products and services developed by contracted companies at newly constructed logistics centers and store businesses, and thus create further synergies between partners.

In addition to these benefits, the SENKO Group will increase the number of electric trucks and environmentally friendly vehicles used throughout the group on its way to achieving carbon neutrality and environmentally friendly logistics.

<Overview of MIRAI-LABO Co., Ltd.>

- | | |
|---------------------------|---|
| 1. Representative | : Toshio Hiratsuka, President and Representative Director |
| 2. Location | : 3-3-20, Sennincho, Hachioji, Tokyo, Japan |
| 3. Established | : April 2006 |
| 4. Capital | : 730 million yen |
| 5. Main lines of business | : Development of environmental platforms, development and supply of autonomous MaaS core products based on solar panel road power generation, reused EV battery, instantaneous battery switching, energy-efficient illumination, and other technologies |
