

Security Company Joins SENKO Group - Expanding the Business Support Domain -

SENKO Group Holdings Co., Ltd. (Head office: Koto-ku, Tokyo; President: Yasuhisa Fukuda; "SENKO GHD") acquired all stocks of Nissei Security Services (Head office: Suginami-ku, Tokyo; President: Nobuharu Shinohara; "Nissei Security"), incorporating the company into the Group on February 10, 2023.

Nissei Security operates business sites throughout Tokyo and Kanagawa, mainly providing guidance for traffic and heavy machinery around construction sites of leading construction companies, and on-site security services at universities and other locations. It also specializes in railway security services, including watching over rail cars at rail construction sites and patrols within station premises.

Going forward, Nissei Security will respond to the security needs of the SENKO Group logistics sites, and by covering the Group customer's security needs such as construction sites of residential housing construction companies, the SENKO Group aims to further expand the security business. Nissei Security is also seeking to strengthen its appeal to job seekers, leveraging the trustworthiness of SENKO GHD.

SENKO GHD is expanding its businesses into various sectors and industries that require human resources, as it works to establish a "human resources" business. To achieve this, it welcomed into the Group two companies in the human resources dispatching sector that specialize in staffing solutions with foreigners—SELF GROW in Nagoya City, Aichi Prefecture, and Kyoudou Project in Ryugasaki City, Ibaraki Prefecture—in October 2021 and April 2022 respectively, with the view of expanding the regions and industries it operates in.

With the expansion of security, staff dispatching and other businesses, SENKO GHD aims to develop a comprehensive human resources business with a diverse range of human resources capable of playing a role throughout society, and further expanding the business support domain.
