

Fukuoka Branch Expanded in April 2018

RUNTEC Co., Ltd. (Runtec), a core company of Senko Group Holdings Co., Ltd., has expanded its Fukuoka Branch located in Hisayama Town in Kasuya District, Fukuoka Prefecture, and held a completion ceremony on April 13, 2018.

Fukuoka Branch is located between the Fukuoka and Koga interchanges on the Kyushu Expressway. It is a two-story cold/frozen storage warehouse with a total floor area of 32,642 m² (including the 12,028 m² expanded area) and also includes multi-level automated frozen storage warehouse facilities.

The warehouse has a slope that leads directly to the second-floor area, and the dock-sheltered truck berth provides access for up to 79 trucks, so stored products can be sorted without being subjected to outside temperatures. With location management covering a total of 15,600 shelves - around 3,000 in the automated warehouse and 12,600 in the cold/frozen storage warehouse - as well as one cargo elevator and three vertical conveyors, the warehouse is designed for enhanced loading and unloading efficiency.

The refrigerated and frozen storage facilities also operate using energy-efficient natural-based refrigerant freezers. This helps to reduce CO₂ emissions as part of measures to combat global warming.

<Fukuoka Branch overview>

1. Location: 2396-16 Oaza-Yamada, Hisayama, Kasuya, Fukuoka, Japan
2. Building structure: steel-framed 2-story warehouse, 3-story offices and automated warehouse (quake-damping structure)
3. Site area: 46,270 m²
4. Total floor area: 32,642 m²
5. Facilities: cargo elevator x1 (existing), vertical conveyor x3 (including existing x1), energy-efficient natural-based refrigerant freezers, desiccant air-conditioning system

End.
